Product name:	Product code:
Laminate Heat and Stain Resistance Test Apparatus for Worktops	CMI-IND-0471

Description

Test set with a heated steel cylinder at 180 deg C and a kit of standard stain agents for rating heat and stain resistance of decorative laminates. Used by laminate and kitchen worktop manufacturers.

Technical specification

- Heating cylinder
- Stain kit
- Thermometer

A heated cylinder at 180 deg C is placed on laminate for 20 minutes to look for blistering, and stain agents show cleanability. Results rate durability in kitchens.
