Product name:
Laminate Surface Abrasion Resistance Taber Tester for Decorative Laminates

Product code:
CMI-IND-0472

Description

Rotary abrasion tester using weighted abrasive wheels on laminate discs to find the initial wear point of decorative laminates and laminate flooring. Used by laminate and flooring manufacturers.

Technical specification

Abrasive	S-33 paper
Vacuum	Integrated
Standards	EN 13329 Annex E, ISO 4586-2, NEMA LD3
Power	230 V AC, 50 Hz

Standard Accessories

- Wheel set
- Paper strips
- Weights

The specimen disc is rotated under abrasive wheels until the pattern wears through 50 percent. Initial wear point (IP) gives class for laminate floors.
