Product name:	Product code:
ACP Bond Integrity Boiling Water and Humidity Test Bath	CMI-IND-0481

Description

Stainless steel boiling bath with timer and level control that immerses ACP specimens for hours so that delamination and bond loss can be inspected. Used by composite panel producers for durability testing.

Technical specification

- Rack
- Level control
- Lid

Panels are immersed in boiling water for 8 hours and then peel or surface changes are noted. Humidity cycles test environmental durability.

Features

- Stainless steel inner chamber
- Timer
- Level control
- Specimen rack
- Lid with vent

Technical Specifications

Capacity	60 litres
Temperature	Up to 100 deg C
Timer	99 hours
Rack	20 specimens
Material	SS 304
Control	PID
Standards	EN 1999, ASTM D870, ISO 2812-2
Power	230 V AC, 50 Hz, 3 kW

Standard Accessories
