Product name:	Product code:
ACP Peel Strength Drum Peel Tester for Aluminium Skin	CMI-IND-0486

Description

Climbing drum peel tester that winds the aluminium skin of a composite panel onto a drum and records peel force against the core. Used by ACP manufacturers for skin to core adhesion quality control.

Technical specification

- Drum
- Clamps
- Specimen cutter

A flexible aluminium skin is wound onto a drum as the sandwich panel is pulled upwards. Average peel torque and force show the adhesion between skin and polyethylene core.

Features

- Load cell with digital display
- Pre-cut specimen 25 x 300 mm
- Constant speed drive
- Peel graph on PC

Technical Specifications

Capacity	1 kN
Drum diameter	100 mm
Speed	100 mm/min
Specimen width	25 mm
Accuracy	+/- 0.5 percent
Display	Digital with PC
Standards	ASTM D1781, EN 1464, ASTM D903
Power	230 V AC, 50 Hz

Standard Accessories
