Product name:	Product code:
ACP Pencil Hardness and Scratch Test Set	CMI-IND-0487

Description

Wheeled pencil hardness tester carrying a 750 g load at 45 degrees with graded pencils from 6B to 9H for painted ACP surfaces. Used by coating quality control laboratories.

Technical specification

- Pencil set
- Sharpener
- Cart

Graded pencils are pushed over the coating at 45 degrees under 750 g load. The hardest pencil that does not scratch gives the coating hardness.
