Product name:	Product code:
Sack Coating and Lamination Peel Adhesion Tester	CMI-IND-0493

Description

Peel tester with a sliding table that pulls BOPP laminates and coatings off woven PP base at 180 degrees to record peel force. Used by laminators and printers of woven sacks.

Technical specification

- Fixture
- Cutter
- Clamp

The laminate is peeled at 180 degrees from the woven base at 100 mm/min and peel force is recorded. Delamination risk is rated.

Features

- Load cell per
- Load cell 100 N
- Specimen 25 mm
- Constant speed
- Sliding table

Technical Specifications

Capacity	100 N
Speed	100 mm/min
Peel angle	180 degrees
Width	25 mm
Accuracy	+/- 0.5 percent
Display	Digital
Standards	ASTM D903, ISO 8510-2, IS 14887
Power	230 V AC, 50 Hz
