Product name:	Product code:
UV Resistance Weathering Chamber for HDPE and PP Sacks	CMI-IND-0496

Description

Fluorescent UV cabinet with UVA-340 lamps and condensation cycles that ages woven sack fabric strips so retained strength shows stabiliser performance. Used by sack manufacturers and resin suppliers.

Technical specification

- Lamps
- Racks
- Sensor

Fabric strips are exposed to UVA lamps and moisture cycles. Retained tensile strength after hours of exposure shows stabiliser performance.

Features

- UV-340 lamps
- Condensation humidity
- Rack for 30 specimens
- Timer
- Black panel thermometer

Technical Specifications

Lamps	8 x UVA-340 40 W
Black panel temperature	50 to 70 deg C
Specimens	30 strips 75 x 300 mm
Timer	0 to 9999 hours
Irradiance	0.76 W/m2 at 340 nm
Control	PID
Standards	ASTM G154, ISO 4892-3, IS 14887
Power	230 V AC, 50 Hz

Standard Accessories
