Product name:	Product code:
Tri-Angle Gloss Meter for Paint Films	CMI-IND-0570

Description

Digital glossmeter with three measuring angles for specular gloss of paints, plastics and coated surfaces. Used by paint and coating makers to classify finishes from matt to high gloss.

Technical specification

- Calibration tile
- USB cable
- Carrying case

The instrument reflects a light beam at 20, 60 and 85 degrees and measures the reflected intensity in gloss units (GU). The automatic angle selection suits high, semi and low gloss paint films. Data can be stored and exported to a PC.

Features

- Auto operation on any flat area
- Range 0 to 1000 GU
- Calibrated with a polished black glass standard
- Stores 999 readings with statistics
- Rechargeable battery and USB port

Technical Specifications

Test standards	ASTM D523, ISO 2813, IS 101
Geometry	20, 60 and 85 degrees
Range	0 to 1000 GU
Repeatability	+/-0.2 GU
Measurement area	10 x 10 mm at 60 degrees
Memory	999 readings
Display	LCD
Power	Rechargeable Li-ion battery

Standard Accessories
