Product name:	Product code:
Ring And Ball Apparatus	Bitumen0018

Description

Ring And Ball Apparatus

Technical specification

Ring And Ball Apparatus Ring And Ball Apparatus from Civil Mechanical Laboratory India

Also called Softening Point Apparatus. This apparatus is meant for determination of softening point of bituminous materials . Softening point is that temperature at which the specimen Ring And Ball Apparatus for Civil Engineering from Laboratory Equipment Manufacturers India - under test becomes soft enough to allow a steel ball of specific dimension to fall a required distance under test condition. The apparatus consists of Glass beaker of heat resistant glass having internal diameter of 8.5 cm X 12 cm depth (approximately), two steel balls each of 9.5mm diameter, two tapered brass rings, two ball guides, ring stand and a hand stirrer.

Electrically Opertaed

Same as above but Electrically Operated.

(without thermometer) complete with one 1000 mililiter flask and one 100 mililiter crow receiver
