NAUGRA®

Product name:	Product code:
D.C. Motor	EEA0004

Description

D.C. Motor

Technical specification

Strong base frame in C.P. handle, heavy duty bolt and perfect spring of dial type helps in accurate reading of machines.
DC motors are ISS 4722 confirmed
Available ratings: 220V/380V/440V, 0.5H.P TO 10 H.P.
Types of windings: Shunt/Series/Compound type.

D.C. Motor Manufacturer

With the help of experienced personnel and advanced technology, we manufacture and supply durable and reliable quality D.C. Motors using high quality raw materials. These D.C. Motors are mainly used in various industrial applications as per requirements. Our wide ranges of these motors are appreciated for its unique features like high tensile strength, excellent finish, rust resistance and durable performance. These motors are available in various sizes, shapes and dimensions as per the requirements of clients.

Features:

Permeability steel especially used to make yoke
Bearings in large size for trouble free and longer life operations
Superior quality silicon used for armature stamping
Durable quality fans are used for cooling
For the nonstop performance, copper conductors are made with high quality insulated materials.
Field windings and armatures are impregnated with vacuum pressure for the best insulation strength
To ensure the low noise, off center rotor construction is in dynamic balance.
Uniform/constant pressure brush holders
Loading pulley as well as armature should be dynamically balanced
Terminal box fixed with all terminals properly
