Product name:	Product code:
Micro kjeldahl digestion unit	ELE-0022

Description

Micro kjeldahl digestion unit

Technical specification

- Constantly monitor the digestion process on display
- Conforms to Good Laboratory Practice standard

Traditional Kjeldahl Digestion Units for nitrogen analysis and protein determination, with an aluminum heating block that offers an excellent thermal homogeneity, with a maximum working temperature of 450°C.

High Performance

- Excellent thermal homogeneity
- High temperature stability with aluminum block
- Good repeatability of temperature
- Premium quality consumables

Convenient to Use

- Choice of 6 operating languages
- LCD display of all parameters
- 20 customizable program memories

Practical Considerations

- Very small footprint
