Product name:	Product code:
Block Making Machines Hydraulic	SEL-0020

Description

Block Making Machines Hydraulic

Technical specification

we have been able to hold all the aces in designing and developing the best Hydraulic Block Making Machine. Our engineers develop these machines using high-grade basic material and electrical components so as to bring forth high performing and user-friendly products. They understand and value divergent demands of the clients, and develop products in different technical specifications.
Features:
High compressive strength
Non-corrosive body
Longer functional life
Low power consumption
Excellent finish
Semi-Automatic, Manual & Automatic
Operation Type Automatic
Power 5 HP
Capacity 1500 Blocks/Hour
Automation Grade Automatic
Capacity (Blocks per hour) 800-1000
Method Hydraulic Pressure
Block Type Interlock & Paver
