Product name:	Product code:
Under And Over Voltage Relay Setup	EES0005

Description

Under And Over Voltage Relay Setup

Technical specification

Under And Over Voltage Relay Setup Manufacturer

As one of the trusted suppliers and manufacturers, we offer a durable and reliable quality range Under/Over Voltage Relay Setup as per the industrial standards. These relays help in current flowing within the electronics isolated circuit ensuring the protection from overload. We offer these relays in various grades and sizes as per the requirements of clients at reasonable prices. These relays are built-in digitally indicating the power supply.
Features:

- Current limiter and auto transfer are the continuous variables for the safety of phantom fault
- Through M.C.B power on/off system is in built to control relay testing
- Built in Trip status indicator and power on indicator
- To perform the experiments the necessary patch chords and terminals are required for the relay.
- Built in time interval meter Stop/ Start timer (Digital)
- Digital AC ammeter and AC voltmeter
- Under/Over Voltage Relay.
