Product name:	Product code:
Liquid Limit Apparatus	Soil0022

Description

Liquid Limit Apparatus

Technical specification

Liquid Limit Apparatus Liquid Limit Apparatus from Civil Mechanical Laboratory India

- The Liquid Limit Apparatus Is Used To Determine The Liquid Limit Of The Soil, To Classify
- The Soil, Liquid Limit Apparatus for Civil Engineering from Laboratory Equipment Manufacturers India - And To Provide Soil Consistency And Plastic Index Needed In Design & Construction
- It Contains A Brass Pan, Used To Accommodate Soil Specimens, A Base Made From Vulcanite,
- An Impacting Device, A Calculator And A Groove Handler
- Simple Operation Makes It Very Easy To Handle

Specifications

- Electric Motor As Power
- Falling Frequency Of The Disc. : 120 Hit / Min
- In Fall Frequency Of The Disc. : 120 Strikes / Min
- Embedded A Strike Counter
