Product name:	Product code:
Unconfined Compression Tester	Soil0039

Description

Unconfined Compression Tester

Technical specification

Unconfined Compression Tester

Unconfined Compression Tester from Civil Mechanical Laboratory India

Unconfined Compression Tester The ruggedly constructed machine eliminates laborious process of hand compaction and so results in a very even degree of compaction. Unconfined Compression Tester for Civil Engineering from Laboratory Equipment Manufacturers India - The unit incorporates a compaction pedestal; constructed to satisfy ASTM D-1559 and BS 594 comprises a hardwood block secured to a concrete base by a 300mm square x 25mm thick steel plate. The drive mechanism lifts the 4.53 kg compaction weight to the correct height of 457mm and allows free fall.
