Product name:	Product code:
Proving Ring	Soil0041

Description

Proving Ring

Technical specification

Proving Ring

Proving Ring from Civil Mechanical Laboratory India

Proving Ring are used for load measurements and are used in the outfits of a number of Soil/Cement & Bitumen Testing Equipments like Direct shear Test Apparatus. Proving Ring for Civil Engineering from Laboratory Equipment Manufacturers India - Triaxial Shear Test Apparatus, C.B.R. Test, Uncontained Test, and Marshal Test etc.
Proving rings can be designed to measure either compression or tension forces. Some are designed to measure both. The basic operation of the proving ring in tension is the same as in compression. However, tension rings are provided with threaded bosses and supplied with pulling rods which are screwed onto the bosses
