Product name:	Product code:
Hydraulic Ram	Fluid00016

Description

Hydraulic Ram

Technical specification

Hydraulic Ram Hydraulic Ram

The **Hydraulic Ram** includes an acrylic base incorporating pulse and non-return valves and a supply reservoir on a stand which is fed by the Hydraulics Bench.

An air vessel above the valve chamber smooths cyclic fluctuations from the ram delivery.
The weights supplied may be applied to the pulse valve to change the closing pressure and hence the operating characteristics.

Specification:

- Pump body manufactured from clear acrylic with stainless steel pulse and non-return valves
- Outlet hose with variable head arrangement
- Adjustable acrylic header tank with inlet and outlet hoses
- Fast release fitting for simple connection to hydraulics bench
- Supplied with weights to load pulse valve
- Educational Software available as an option
