Product name:	Product code:
Two-Stage Series And Parallel Pumps	Fluid00047

Description

Two-Stage Series And Parallel Pumps

Technical specification

Two-Stage Series And Parallel Pumps Two-Stage Series And Parallel Pumps

Experiments

1. Comprehensive demonstrations and investigations into a centrifugal pump including:
2. Centrifugal pump performance and characteristics, typically head versus flow and efficiency versus flow
3. Non-dimensional performance characteristics
4. Flow measurement using a Venturi tube
5. Demonstration of cavitation
6. Operation of centrifugal pumps in series
7. Operation of centrifugal pumps in parallel

Standard Features

1. Supplied with comprehensive user guide
2. Made in accordance with the latest European Union directives
