Product name:	Product code:
Horizontal Flow Tank	Fluid00051

Description

Horizontal Flow Tank

Technical specification

- 1x diameter: 4mm
- 1x diameter: 8mm

Inserts with square contour

- 1x diameter: 4mm
- 1x diameter: 8mm

Point gauge, 8 movable rods

- length: 350mm

Specification Of **Horizontal Flow From A Tank**

- Study of horizontal flow from tanks
- Determining the contraction coefficient for different outlet contours and diameters
- Tank with adjustable overflow and scale
- Four interchangeable inserts with different diameters and contours
- Point gauge with eight movable rods for visualisation of the jet path
- White panel for recording the trajectory
- Flow rate determined by base module
- Water supply using base module or via laboratory supply

Technical Data

Tank

- Height: 510mm
- Diameter: 190mm
- Contents: approx. 13,5L

Inserts with rounded contour
