Product name:	Product code:
Series and Parallel Pumps Demonstration Unit	Fluid00072

Description

Series and Parallel Pumps Demonstration Unit

Technical specification

- Experimental unit for series, parallel and individual operation of centrifugal pumps
- One pump with adjustable speed and one pump with fixed speed
- Measuring of pressure and flow rate
- Processing of measured data on a PC
- LabVIEW software for data acquisition via USB under Windows XP, Windows Vista or Windows 7

Technical Data of Series and Parallel Pumps Demonstration Unit:

- Pumps with motors
- Power consumption, both pumps: 650 W
- Pump with adjustable speed: 0...3.300 min-1
- Max. flow rate: 40 L/min with one pump
- Max. head: 10 m
- Pipes and fittings made of PVC
- Tank for water: ca. 15L

Series and Parallel Pumps Demonstration Unit Series and Parallel Pumps Demonstration Unit

We are widely engaged in offering a large assortment of **Series And Parallel Pumps Demonstration Unit** to our valuable clients. The offered units are used for measuring of pressure and flow rate. These units are quality approved against the defined industry norms and standards by the qualified quality professionals. Additionally, customers can avail these units in bulk quantities at competitive prices.
