Product name:	Product code:
Chemical Reactors Bench	Chemical0022

Description

Chemical Reactors Bench

Technical specification

Chemical Reactors Bench

Specifications:

- Base Unit
- 2x tanks for feeding the reagents with a capacity of 5 litres each for feeding reagents
- 2x peristaltic feed pumps with a flow rate of 0 to 118 millilitres per minute
- Circulation pump for hot water with electronic temperature control and safety thermostat manufactured from stainless steel.
- Digital conductivity meter with sensor.
- Electrical control unit with earth leakage circuit breaker, 2 displays for r.p.m. of pumps, a display for stirring rate and an electronic thermostat.
