Product name:	Product code:
Pumping Plant	EEH0002

Description

Pumping Plant

Technical specification

Pumping Plant Manufacturer
Simulation

The equipment simulates the pumping plant including :

- A well in link with the ground water.
- A buffer tank.
- A water tower.

Rough description of the functioning :

- A sinking pump pumps in the groundwater and fill a buffer tank.
- Three pumps take this water and fill a water tower.
- Three solenoid valves placed on the water tower simulates the household consumption with water return to the cover
