Product name:	Product code:
Single Phase Transformer Lab	Educational0002

Description

Single Phase Transformer Lab

Technical specification

Single Phase Transformer Lab

Single Phase Transformer Lab is an elite training system for the Electrical laboratories. The product helps you to get fully acquainted with the basic concepts and functioning of a Single-phase Transformer. The product is represented in such an easy way so that each test can be studied differently in proper sequence. The Lab practically expertises you in exercises like Polarity, Turns Ratio, Transformation Ratio, Iron Loss, Copper Loss, Efficiency etc.The varied scope of learning makes the subject understanding complete.

- R-Core Transformer
- Exclusive and rugged designed panel
- Stand alone operation
- Terminals are provided in different sections
- Designed by considering all the safety precautions
- High quality meters
- Diagrammatic representation for the ease of connections
- Provided with an extensive e-manual
