Product name:	Product code:
Mini Process Control Demonstrator	Instrumentation0005

Description

Mini Process Control Demonstrator

Technical specification

Mini Process Control Demonstrator

In this modern era, instrumentation & control engineering have major share for the industrial growth, whilst process control is a vital concept of it. The functionality and complexity of process control have been increased.

Mini Process Control Demonstrator endows students and industry professionals to understand the concepts and working of thermal process control which enables them to learn advance and more complex thermal process; and contribute in the growth of instrumentation arena. It formulates students to accumulate, develop and practice the fundamentals of thermal process control.

Mini Process Control Demonstrator has sensors like temperature sensor, liquid level sensor, level indicators. It has safety measures such as emergency shutdown and overheat protector. There is a wide range of experiments that can be performed on the trainer. It also has computer interfacing with real time graphical analysis which helps to perform mathematical calculations required to state stability of process using methods like root locus, bode plot, etc
