Product name:	Product code:
Turning Frog (Sound Sensor)	Robotic0007

Description

Turning Frog (Sound Sensor)

Technical specification

Turning Frog (Sound Sensor) This is an interesting robotics kit. The Robot is able to produce sequentially repeated movements when it detects a sound: the frog starts up, moves forward, stops, turns left, stops, turns right and stops. This robotics initiation kit includes 2 motors with gears to be assembled and a microphone to be used as a sound sensor. It requires 2 x 1.5V type AA batteries and a 9V battery all sold separately. Caution: soldering iron required
