Product name:	Product code:
Industrial Refrigeration Unit	EEW0005

Description

Industrial Refrigeration Unit

Technical specification

Coolant recovery and refilling system consisting of: needle, liquid and moisture passage indicator, filter dehydrators.

Required services

230 V – 50 Hz single phase

Dimensions and weight

180 x 80 x 180 cm – 157 kg

Industrial Refrigeration Unit Manufacturer
Industrial Refrigeration Unit

This bench is mounted on a steel frame with aluminium nuts, with 4 castors, 2 locking

The compact refrigeration unit is manufactured from high quality components for a technical component.

Technical specifications

Hermetic compressor, 400 W
Forced air condenser with variable rate of flow
2 refrigeration chambers with independent evaporators
Thermostatic regulation valves and pressure regulator
Temperature regulation with adjustable differential
Exchanger for under-cooling of liquid
Data acquisition system for operational parameters consisting of: 1 floating flowmeter, 2 pressure gauges 0-15 and 0-35 bars
Temperature sensors throughout the circuit
Wattmeter – voltmeter – ammeter
