Product name:	Product code:
Inductive Load	EEF0001

Description

Inductive Load

Technical specification

Inductive Load Manufacturer
Features:

- It works on variation of air gap principle.
- Works on principle of air gap variation.
- High grade silicon used with stamping
- Fitted in trolley with MS box coated with powder
- Voltage and ammeter are used to find the voltage and current at variable loads
- Copper conductor connected with 3PH choke coil star.
- For the high insulation strength, wound coils are impregnated in vacuum pressure

Available Rating:

- 5A/10A/15A/20A for 1ph and 3ph types of Inductive load
