Product name:	Product code:
Four Cylinder Petrol Engine	Fluid Equipments0035

Description

Four Cylinder Petrol Engine

Technical specification

- Torque: max. 155nm at 4150min-1
- Compression ratio: 11:1
- Ignition sequence: 1-3-4-2
- Starter battery: 12V

Four Cylinder Petrol Engine

Water-cooled four-cylinder petrol engine for setup of a test stand in conjunction with the load unit

- Engine flexibly mounted on mobile frame with vibration-insulated base plate
- Force transmission to brake via rotationally elastic coupling and cardan shaft
- Engine complete with fuel supply (tank, pump, hose) and cooling water circuit
- Sensors for cooling water flow rate and temperatures (exhaust gas, cooling water, fuel, oil)
- Transfer of measured data via data cable from switch cabinet to CT 400 switch cabinet
- Switch cabinet with warning lamps (oil pressure, alternator failure), operating time counter and ignition key

Technical Data

Water-cooled four-cylinder petrol engine

- Displacement: 1596cm³
- Bore: 79mm
- Stroke: 81,4mm
- Power output: max. 84kw at 6000min-1
