Product name:	Product code:
Resistive Load	EEF0002

Description

Resistive Load

Technical specification

Resistive Load Manufacturer

Under the able guidance of our experts, we manufacture Resistive Load devices using high quality raw materials ensuring the durability and non stop functioning's. These devices develop an electrical load, and apply the load to the sources of electricity and converting the ensuing output of the source. The main work of the Resistive Load devices is to follow the operational load handled by the power sources.
Features:

- Fixed resistors with proper ratings having low temperature co-efficient wound on circular porcelain pipe.
- Rotary switches with fuses of proper grade used both in three phase and single phase types of load.
- It is air cooled device, housed in perforated MS Sheet (Trolley Type).
- Suitable for loading of DC Generators / Transformers/AC Alternators

Rating Available

- 10KW/7.5KW/3.75KW/5KW/7.5KW/2.5KW both in 3Phase and 1Phase
