

Product name:
Liquid Mix Training Set

Product code:
CIVIL-LMT-49-0001

Description

Liquid Mix Training Set

Technical specification

Overview of the liquid mix training set

The liquid mix training system is composed of mixing device and material storage. Both liquids are transferred to mixing device as required; The stirring motor driven stirring impeller rotate to mix the liquid. There is a solenoid valve on the below end of the mixing device which control mixed liquid flow to storage device.

Technical parameter of the liquid mix training set

Total dimension : 680×450×560mm

Input power : DC 24V

Capacity :

Optional

Mitsubishi PLC module (analog) Siemens PLC module (analog)

Computer, PC software HMI module

Training content

Training 1 Switch liquid mixture training

Training 2 Analog mixing liquid training

Training 3 Liquid mixing comprehensive training
