NAUGRA®

Product name:	Product code:
Vocational Band Saw Machine	VOC-WOD-0001

Description

Vocational Band Saw Machine

Technical specification

Available in material options of carbon steel, stainless steel, copper.

Cutting shape options of round, square, rectangle, solid bar.

Hydraulic driven clamping and saw blade movement.

Provides for good cutting quality without burs.

Support of water cooling and lubricate system for enhancing the service life of the machine and saw blade.

Quality mechanical parts used to ensure high stability machine running.

Rotating speed of 70/35 Giri/min.

Support of water cooling and lubricate system for enhancing the service life of the machine and saw blade.

Quality mechanical parts used to ensure high stability machine running.

Rotating speed of 70/35 Giri/min.
