Product name:	Product code:
Diesel Fuel Injection System VE pump	AUT0-0009

Description

Diesel Fuel Injection System VE pump

Technical specification

VE pump Injection study.

Able to understand composition of Diesel Fuel Systemin automobile and fundamental principles.

Pump is operated by the motor, able to measure the Fuel injection in accordance with RPM.

Specification:-

Composition:- 1) Single Phase ½ HP motor, 2) Timer, 3) VE pumpInjection

Size:- Approx. 600 X 400 X 1,200 mm

Training Contents

Measuring the injection according to RPM.

Checking the injector status.

Checking the injector pump status.

Oil flow Measurement.
