| Steering and Suspension System Trainer | AUT0-0038 |

## Description

Steering and Suspension System Trainer

## Technical specification

Diagnose power steering fluid leakage.

Remove, inspect and replace power steering pump, mounts, seals, pump belt, pump pulley and pump belt.

Inspect, replace and adjust track rod ends, track rod sleeves and clamps.

Remove, inspect and install upper and lower wishbones, bushes, shafts, and rebound bumpers.

Remove, inspect, and install hub carrier assemblies.

Inspect, remove and replace dampers.

This real component trainer provides the instructor with a working light vehicle steering and suspension system for group or whole-class demonstration.

This includes all the individual components of the system presented on a moveable, steel frame so that each component can be clearly identified.
