Product name:	Product code:
Modern Auto Lighting Circuits Trainer	AUT0-0048

Description

Modern Auto Lighting Circuits Trainer

Technical specification

Our range of Autotronics boards are designed to provide a practical approach to theoretical learning, as well as developing technical skills for electronic system fault finding.

The resource is contained within an ergonomic plastic base with a hinged cover that also provides a mechanism to tilt the trainer towards the user for ease of use.

Typical Activities Include:-

Explore CAN Bus Park, Tail, and Headlight Systems

Investigate CAN Bus Fog Light Systems

Explore CAN Bus Turn Signal and Hazard Warning Systems

Explore CAN Bus Stop and Reverse Light Systems.

Perform CAN Bus Park and Tail Light System Measurements
Perform CAN Bus Headlight System Measurements
