Product name:	Product code:
Modern Auxiliary Systems Trainer	AUT0-0050

Description

Modern Auxiliary Systems Trainer

Technical specification

Diagnose 7 Different CAN Bus Auxiliary Faults

Students are set tasks that encourage them to explore CAN Bus electric window, door mirror, seat and central locking circuits practically and improve their knowledge of these systems.

Students will also be directed to work through a number of fault-finding activities (7 in all), encouraging fault-diagnosis skills.
