Product name:	Product code:
Voltameter	EDU-GLS-0002

Description

Voltameter

Technical specification

- For demonstrating decomposition of water.
- This design is preferred for work of best precision.
- Platinum electrodes are used electrolysis of water.
- The electrodes are mounted with rubber stoppers for insertion in the open ends of the voltmeter limbs.
- The unit has two connected limbs, integral with reservoir tube and funnel shaped bulb, with a stop clock at the top of each limb.
- With suitable metallic stand, helps to prevent accidental breakage.
- Glass parts are made from corning glass.
