NAUGRA®

Product name:
Flocculator Jar Test Apparatus

Description

Flocculator Jar Test Apparatus

Controls Keypad	Touch sensitive
Digital Display	LED
Power	230V, 50Hz, 100W

Technical specification

Accepts two, four & six samples
Digital indication of speed and time
Two pre-set programs
Built in illumination for easy viewing of samples
Flocculation/Jar Test Apparatus, is a flocculation (jar) tests on water and effluent samples.
A digital display clearly indicates the speed of the rotating stainless steel paddles, which can be varied from 25 to 250rpm.
The digital timer can be set to count down from 1 to 99 minutes.
After count down, the paddles stop and an alert sounds.
The timer then counts up in minutes in order to measure settling time.
Two pre-set programs allow routine speed and time parameters to be input and then selected by simply pressing one button.
Parameters are stored in the memory and can be recalled or altered at any time.
The intuitive touch sensitive keypad is totally flat for easy cleaning.
