Product name:	Product code:
Colorimeter and Accessories	NUGBLY0051

Description

Colorimeter and Accessories

Technical specification

Programmable Colorimeter
Complies with ISO 9001, 2008 Certificate
Digital display in absorbance, transmission and concentration models Microprocessor control incorporating full programmability allowing up to 100 methods to be installed by user
With recorder and output
Colorimeter is a high precision, high stability, versatile colorimeter. Has three measuring light sources
Wave Length range: 400-750nm, Wavelength selection: Filter Wheel, Bandpass: Gelatin filters 40nm. Interference filters 6nm to 10nm (optional),
Absorbance Range: 0.000-1.999A, Absorbance Resolution: 0.001 A, transmission range T: 0 to 100% to all models, Transmission: 1%; Photometric Reproducibility: ± 1% T; light Source: Glass Halogen
