Product name:	Product code:
Dissolved Oxygen Meter /BOD/oC + Accessories	NUGBLY0060

Description

Dissolved Oxygen Meter /BOD/oC + Accessories

Technical specification

Dissolved Oxygen Meter /BOD/oC
Complies with ISO 9001, 2008 Certificate This meter is a great value. The ranges work to test water quality in wastewater, surface water, groundwater, or drinking water. LCD shows results in ppm or mg/L with enunciators to aid in use and troubleshooting. Six simple buttons allow for freezing measurements, toggling between display units and temperature results, setup, calibration, and automatic barometric and salinity compensation after manual parameter inputs. Additional benefits of the simple design allow you to view electrode slope, zero offset, and millivolt values for electrode diagnostics. Automatic calibration at 100% and independent 0% calibration enhances sensitivity for low oxygen measurement. Automatic compensation after manual input of barometric pressure and salinity values for variations in oxygen solubility to ensure optimum results.
Includes a self-stirring polarographic BOD probe. Salinity 0 to 50 ppt
Dissolved oxygen 0 to 19.99mg/L Temperature C -5 to 50
