

Product name:
Multicoloured LED bulb

Product code:
CIVIL-OPT-113-0001

Description

Multicoloured LED bulb

Technical specification

It can be used to show a consumer application of colour mixing principles, and also as a convenient source of coloured light for experiments in reflection and absorption of colour.

This LED mains bulb uses red, green and blue LEDs in a frosted glass globe to create a diffuse light source of controllable colour.

Supplied with a remote control to choose the colour and select the mode (flash, strobe, fade and smooth).

The remote control takes a battery (included).

Luminous flux: 70 lm

Voltage: 230 V

Power: 3 W
