

Product name:
Demonstration Dynamo DC

Product code:
CIVIL-ELC-115-0001

Description

Demonstration Dynamo DC

Technical specification

A mounted armature, comprising two coils of copper wire, is rotated about a horizontal axis by turning the hand cranked drive wheel within a magnetic field, created by the permanent U-magnet supplied with the unit.

This demonstration model facilitates the understanding of how a dynamo works, thanks to the open and exposed design.

Mounted on a plastic base with LED and two 4 mm sockets for connection to measuring instruments.

Base Dimensions (W x L): 150 x 200 mm.

Drive Wheel Dimensions (Dia.): 140 mm.
