

Product name:
Bar and Gauge Apparatus

Product code:
CIVIL-HET-123-0003

Description

Bar and Gauge Apparatus

Technical specification

Heating the bar and then comparing it to the gauge provides an excellent visual demonstration of thermal expansion.

For illustrating expansion by heating and contraction by cooling.

Comprising a bar of iron mounted on a support rod with wooden handle, and a brass gauge with a cut-out which barely admits the bar lengthways while cold, and a hole which passes the bar endways only while cold.
