

Product name:
Lung Volume Kit

Product code:
CIVIL-GEN-131-0003

Description

Lung Volume Kit

Technical specification

The volume of air trapped in the bag is measured in litres and for all practical purposes represents a person's lung volume, though a small portion of air always remains in the lungs.

Lung Volume Kit is used to measure vital capacity, the volume of air a person can expel after taking the deepest possible breath.

Comparisons can be made between a person's lung volumes and such factors as height, age, physical activity and smoking habits.
