

**Product name:**  
Buchner Funnel 90 mm Porcelain

**Product code:**  
CIVIL-FNL-159-0003

## Description

Buchner Funnel 90 mm Porcelain

## Technical specification

A Buchner Funnel is used for vacuum filtration. This porcelain Buchner funnel is 90mm diameter and has a capacity of about 200 ml. The stem tapers from about 22 mm OD at the end to 30 mm OD at the cone. The one-piece design of the porcelain 90 mm Buchner funnel is perfect for vacuum filtrations. The filter platform has dozens of small holes (about 1/8") provide filtration efficiency. Porcelain is durable, acid and alkali resistant, easy clean and autoclavable. Be sure to order with 11 cm filter paper, which will need to be cut down.
