

Product name:
Chromatography TLC Plates Polygram Pre-Coated

Product code:
CIVIL-CHR-145-0002

Description

Chromatography TLC Plates Polygram Pre-Coated

Technical specification

The carrier sheet is polyester, 0.2mm thick and is resistant to all organic solvents commonly used in TLC. The plates can be rolled to fit into chromatography cylinders. Coated with Silica Gel, average pore diameter 6 angstroms, layer thickness 0.25mm with fluorescent indicator. Can easily be cut with scissors forming smaller plates which may be used to facilitate the further development of a given spot.
