Product name:	Product code:
Automotive Electronics Trainer	CIVIL-TRN-183-0001

Description

Automotive Electronics Trainer

Technical specification

The system schematic panel shows the wiring of an automotive electrical circuit complete with test points available for measurement by test lamps, multimeter and oscilloscope.
Realistic troubleshooting exercises are provided with error answer feedback featuring electrical test points and interactive fault simulation.
This trainer provides a realistic simulation of automotive electrical systems with real time results and modular panel layout.
