Product name:	Product code:
Electrical Incinerator	CIVIL-INC-185-0001

Description

Electrical Incinerator

Technical specification

These comprise of two chambers, electrical heater and a blower.
It is highly power efficient with less operating time.
It has a very robust design and has a high temperature refractory lining so as to protect its surface from the effect of high temperatures.
They heat up quickly and produce minimal smoke and smell.
Features:-
Robust construction
Virtually smoke and smell free with secondary burners.
High temperature refractory lining.
Quick heat up time and lesser operational time
Easy installation
Trouble free operation and maintenance
Designed to meet standards of Central Pollution Control Board (CPCB)
Specifications:-
Capacity:- 15 to 20 kg
Material:- Stainless steel
