

Product name:
Linear Airtrack and Blower 2 Meter

Product code:
CIVIL-FOC-114-0005

Description

Linear Airtrack and Blower 2 Meter

Technical specification

The kit contains everything required for a vast array of experiments covering: Velocity; force and acceleration; potential energy; kinetic energy; conservation of energy; motion on levels and inclined planes etc. This kit is to provide a cost-effective system for the study of all aspects of dynamics in a virtually friction-free environment. It is particularly effective in the field of collisions where conservation of momentum is dramatically demonstrated. The track itself measures 2 metres overall and is made from strong 56 x 56mm extruded aluminium. Gliders are designed to accept standard slotted masses for additional loads. It is supplied with a comprehensive accessory pack to facilitate every type of interaction.
