

Product Name :
Cavitation Demonstration Apparatus

Product Code :
Fluid00033

Description :

Cavitation Demonstration Apparatus

Technical Specification :

Cavitation Demonstration Apparatus

Cavitation Demonstration Apparatus

Cavitation Demonstration is a small scale apparatus designed to demonstrate Cavitation utilizing an Hydraulics

Bench

- The apparatus consists of a circular Venturi shaped section manufactured from clear acrylic
- Three Bourdon gauges indicate the static pressure upstream of the contraction, inside the throat and downstream of the expansion
- Flow control valves upstream and downstream of the test section allow flow conditions to be optimised for the demonstration of Cavitation
- Quick release fitting for easy connection to hydraulics bench
- Educational software available as an option

Technical Details

- **Upstream pressure gauge:** 63mm diameter, Range 0 to 1 Bar
- **Throat vacuum gauge:** 100mm diameter, Range -1 to 0 Bar
- **Downstream pressure gauge:** 63mm diameter, Range 0 -1 Bar
- Can be operated independently from the Hydraulics Bench for visualisation only utilizing a cold water mains supply with 0.4 litres/sec at 2 Bar gauge.
