

Product Name :
Fatigue Testing Machine

Product Code :
STL-0003

Description :

Fatigue Testing Machine

Technical Specification :

Fatigue Testing Machine

Fatigue Testing Machines are available in vertical or horizontal orientations. Horizontal systems feature a fixed spindle with sliding tail stock while vertical systems employ a sliding drive spindle.

Maximum torsional stiffness and minimal axial friction is achieved with a roller slide frame design. A reaction torque transducer can be mounted to the tail stock or a rotary torque transducer can be mounted to the drive spindle to accommodate a wide range of applications. Users can manually adjust control gains and end point values on the fly or activate amplitude control
